PROFESSIONAL SUMMARY

DevOps Engineer Intern with hands-on experience in AWS, Docker, Kubernetes (Amazon EKS), Terraform, Jenkins, Linux, Git, and CI/CD through practical cloud deployment projects. Skilled in containerization, cloud infrastructure, Infrastructure as Code (IaC), deployment automation, and monitoring. Seeking a DevOps Internship to contribute to cloud-native application development and automation.

TECHNICAL SKILLS

Cloud: AWS (EC2, IAM, VPC, ECR, EKS, CloudWatch)

DevOps: Docker, Kubernetes, Jenkins, Terraform, CI/CD

Version Control: Git, GitHub

Monitoring: CloudWatch, Prometheus, Grafana

Operating Systems: Linux, Windows

Scripting: Bash

PROJECTS

Cloud Native Application Deployment using AWS EKS

Tech Stack: AWS, Docker, Kubernetes, EKS, ECR, CloudWatch

Containerized a React application using Docker.

Provisioned an Amazon EKS cluster and deployed the application.

Created Kubernetes Deployment and Service manifests.

Managed container images with Amazon ECR.

Configured LoadBalancer and monitored the application using CloudWatch.

CI/CD Pipeline Automation

Tech Stack: AWS CodeBuild, CodePipeline, GitHub, Docker, Kubernetes

Built an automated CI/CD pipeline using AWS CodeBuild and CodePipeline.

Integrated GitHub for source control.

Automated Docker image build, push to Amazon ECR, and Kubernetes deployment.

Infrastructure Provisioning using Terraform

Tech Stack: Terraform, AWS

Provisioned AWS infrastructure using Infrastructure as Code.

Created VPC, Security Groups, and networking resources with Terraform.

DEVOPS TRAINING

HCL GUVI – DevOps Training (3 Months)

Technologies: Linux, Git, GitHub, Docker, Kubernetes, Jenkins, AWS, Terraform, CI/CD, Prometheus, Grafana, Bash Scripting.

EDUCATION

B.Tech – Computer Science & Engineering (Artificial Intelligence)

Vels University, Chennai | Expected Graduation: 2028
